Pharmaceutics International, Inc. (Pii) to Platform West Pharmaceutical Services, Inc.’s Daikyo Crystal Zenith® Container-Closure Components for Aseptic Fill-Finish

PRESS RELEASE Hunt Valley, MD (August 3rd, 2021)

Pharmaceutics International, Inc. (Pii), a contract development and manufacturing organization (CDMO), will include Daikyo Crystal Zenith® (CZ) container-closure components, offered by West Pharmaceutical Services, Inc. (West), as part of its aseptic fill-finish capabilities across vials, syringes and cartridges.

Recognizing the growing demand for high quality and advanced containment systems, as well as small and medium-sized batches, Pii has enabled its AST GeniSYS® R sterile fill finish system to handle West’s CZ platform to provide our customers with more options, greater flexibility, and strategies to de-risk their product development. Pii’s expertise and experience in developing and manufacturing high-value, complex molecules will be greatly improved with the addition of CZ polymer containers that offer high quality standards, design customizations, and flexibility, along with physical and chemical benefits.

Pii’s initial implementation will be filling ready-to-use (RU) syringes and cartridges in its aseptic fill-finish processes. According to Dr. Kurt Nielsen, President and CEO of Pii, “this new capability supports our strategic objectives of providing flexible solutions for our clients as we help them overcome the most significant development and production challenges in advancing complex parenteral formulations.”

“Integrating CZ polymer containers and delivery devices with the agile capabilities of the AST GeniSYS R offers a vertically integrated set of solutions that are key to Pii’s ability to streamline our pharmaceutical development services and deliver quality results faster ” says Devan Patel, Senior Director, Project Management at Pii. For a typical project, pre-sterilized delivery devices will arrive at our facilities in a syringe nesting system using bulk nested trays. This minimizes the risk of contamination and shortens project lead time.

Pii

Pharmaceutics International, Inc. (Pii) is a US-based contract development and manufacturing organization (CDMO) with a passion for solving problems. Pii’s Hunt Valley, Maryland campus includes

70 manufacturing suites with four integrated aseptic filling lines delivering quality, safety, and efficiency. Our professionals have extensive experience with small and large molecule compounds, developing and manufacturing complex parenteral drugs, extended-release formulations, non-aqueous injectable drug products, and lyophilization.
